Comments: The UAA was conducted in June 2005 and no WBCR was observed. At the only site assessed, the stream was dry. Because this site was not close to the mouth (about 1.5 miles US) and the stream is joined by a good sized tributary, the committee feels there is insufficient information to make a determination about the WBCR designation and recommends more data be gathered.

Committee Recommendation: ☐ Retain Use ☐ Modify Use ☐ Remove Use ☒ Inconclusive
